# Suggestions / Challenges / issues in implementation of Project.

There is huge opportunity in rural areas for the growth of numerous off-farm sector activities and in particular the Apparel sector.

- Students and parents prefer part-time and on-the-job training as compared to full-time courses as it provides them an opportunity to earn while they learn.
- Students and parents in Eastern UP and TN prefer Govt. jobs over Pvt sector opportunities, surprisingly this preference is much stronger in TN as compared to eastern UP.
- Students in Eastern UP are strongly inclined towards white-collar service and blue-collar manufacturing jobs.
- Lack of basic infrastructure, training facilities, and a sense of social disapproval are key challenges for women attending skill training courses in rural UP.
- The preference towards "softer skills" is prominent amongst the women students in UP as compared to TN.
- The introduction of micro duration courses and the inclusion of English speaking and personality development modules will increase the attractiveness of skill programs amongst students.
- Lack of awareness is partly responsible for poor mobilization public meetings, televisions, pamphlets & mobile SMS are the effective means of reaching out to students in rural UP & TN.
- Word of mouth endorsement is critical advice from parents and testimonials from successful students are the biggest influencers for students while deciding on skill training institutions and courses.
- State intervention in terms of fee subsidies, scholarships, and placement assistance will act as a catalyst towards student mobilization in UP.

#### Mobilization:-

During the mobilization in rural areas there is much challenges facing.

Candidates are not willing to come out for many reasons even they wants to take that type of training.
